

## LAB EXERCISE 2

AZDAYANA BATRISYIA BINTI AZAHARI (A24CS0230)

labexercise2.cpp > main()

```
1  #include <iostream>
2  using namespace std;
3
4  int main ()
5  {
6      char op ;
7      float num1, num2, result;
8      char loopChar ;
9
10     do {
11         cout << "Enter two numbers: " ;
12         cin >> num1 >> num2;
13
14         cout << "Enter an operator (+, - , *, /): ";
15         cin >> op ;
16
17         switch (op) {
18             case '+' :
19                 result = num1 + num2 ;
20                 cout << num1 << " + " << num2 << " = " << result << endl;
21                 break;
22
23             case '-' :
24                 result = num1 - num2 ;
25                 cout << num1 << " - " << num2 << " = " << result << endl;
26                 break;
27
28             case '*' :
29                 result = num1 * num2 ;
30                 cout << num1 << " * " << num2 << " = " << result << endl;
31                 break;
32
33             case '/' :
34                 result = num1 / num2 ;
35                 cout << num1 << " / " << num2 << " = " << result << endl;
36                 break;
37
38             default:
39                 cout << "INVALID OPERATOR!" ;
40
41         }
42         cout << "Do you want to continue? (y/n)";
43         cin >> loopChar;
44
45     }while (loopChar == 'y');
46
47     return 0;
48 }
```

```
Enter two numbers: 90 804  
Enter an operator (+, -, *, /): -  
90 - 804 = -714
```

```
Do you want to continue? (y/n)n
```

```
